

NORWOOD MARKING SYSTEMS

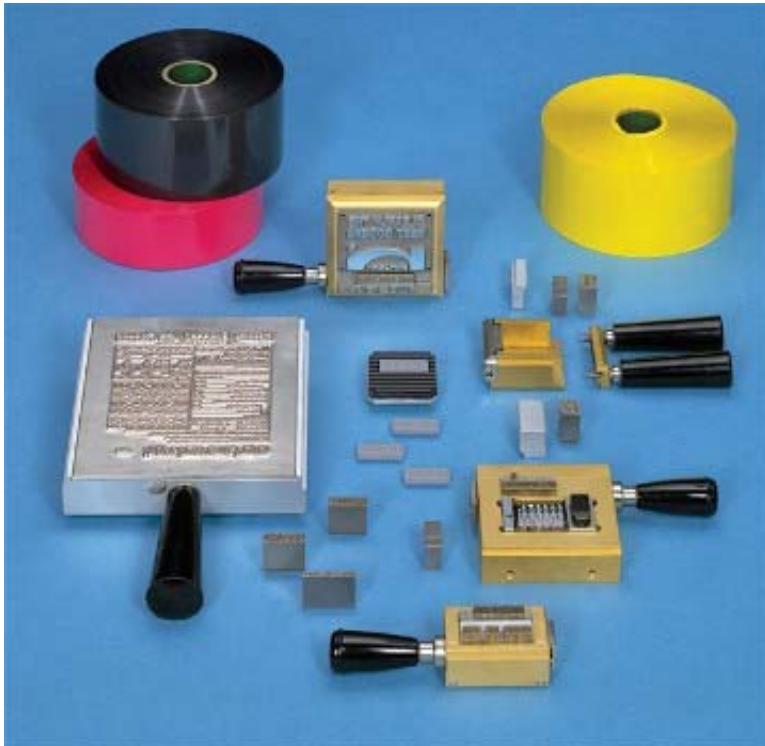

An ITW Company
2538 Wisconsin Avenue
Downers Grove, IL 60515

STEEL TYPE AND MAGNESIUM PLATES

Serving the packaging industry for over 40 years.

Highest Quality Hardened Steel Type

Lasts longer than brass or aluminum! The unique foot and notch design securely holds the type in place to ensure clear, quality imprints time after time. Norwood type is manufactured under strict tolerance specifications to guarantee consistency. We offer a wide range of styles in both individual pieces and logos (one or more characters on one blank). We can custom design logos to your specifications.

Consecutive Numbering Head

Use to automatically change the code on each package or product. Eliminate the need to repeatedly change type.

Magnesium Plates

Available for imprinting large (2" x 2" to 6" x 6") areas:

- * Graphics
- * Instructions
- * Ingredient statements
- * Company logos
- * Special promotions
- * Bar codes & UPC codes

Plates are designed to allow change of variable information.
(for example, sell-by dates).

Typeholders

Available for all Norwood printers.
